Quick guide - ITP smoke curtains

Already have an approved account and a password? Go straight to step 4.

https://www.itp.eu/en/calculator-new/

1 Request a personal account

Open the page below. In the panel on the right, select “Request a personal account”. Use your own email address and enter your company details.

2 Set your password

Open the email from ITP and follow the link to set your password. Check your spam folder. The password of an old shared account does not automatically apply to your new account.

3 Wait for ITP approval

ITP reviews your request. You will receive an email when your access is approved. This is a separate step from setting your password.

4 Sign in to the new calculator

Return to the page below. In “Sign in to the new calculator”, enter your personal email address and chosen password, then select “Sign in”.

Forgotten password or expired link?

On the calculator page, select “Set or reset your password” and enter the email address of your account. Do not request a second account.

Still stuck? Contact info@itp.eu with your email address and the message shown. Never share your password.
